

M, W 8:30-9:45 a.m
HULB 23

Instructor: Ana Espinola, Hulbert 111C, anaespinola@wsu.edu

Office hours: Thursdays 9:00-10:00, or by appointment.

Class webpage: <https://anaespinolaarredondo.com/econs-582/>

Prerequisite: EconS 501 or equivalent.

Content and Purpose:

This course analyzes the theoretical tools and empirical techniques necessary for understanding of resource and environmental economics, developed in both static and dynamic framework. The main focus of the course is on the theory of externalities and regulation theory, as applied to environmental problem. The course gives a special emphasis to environmental problems using game theory and mechanism design. The major objectives of this class are: (1) to enhance the student's ability to conduct professional economic research and to develop and present professional proposals, papers, and presentations; and (2) to increase the student's ability to analyze environmental policies through a deeper understanding of economic behavior and incentives; economic institutions, property rights and contracts.

Texts and Assigned Readings:

The course does not follow any text in particular. There are some books —available in the library— that are referenced a few times:

- **MWG:** A. Mas-Colell, M. Whinston and J. Green, Microeconomic Theory, Oxford University Press, New York, 1995.
- **Kolstad:** Charles Kolstad, Environmental Economics, Oxford University Press, 2000.
- **B&O:** William J. Baumol and Wallace E. Oates, The Theory of Environmental Policy, 2nd edition, Cambridge University Press, 1988.
- **Reny:** Geoffrey Jehle and Philip Reny. (JR) Advanced Microeconomic Theory. 2nd ed. Reading, MA: Addison-Wesley, 2000.

Reading List

You are not expected to read everything that is on this list. However, the readings marked with a "snow flake" should be read in advance of the corresponding class. Note that I may change some of the readings, depending on the class interest. Most article readings are available through WWW.JSTOR.ORG. I will post on the class webpage copies of the papers that we will study during class.

Assignments and Evaluation:

One midterm and four assignments will count 20% and 35% respectively in determining the course grade. A Presentation/submission of a 15-page proposal for your own paper idea. Submission of the 15-page proposal is due on or before the last class meeting December 14th, 2010; no late submissions will be

accepted. A brief oral presentation of the proposal is also required and will be scheduled for the last two weeks of the semester. Midterm and final makeup's are possible only if reasons beyond the student's control can be verified. Please note that all items in this syllabus are subject to change at the discretion of the professor.

Assignments	Number	Percentage
Midterm	1	20%
Homework	3	35%
Written Proposal	1	20%
Oral Presentation	2	25%
Total		100%

Grading Scale:

A	95-100	C-	50-54
A-	85-94	D+	45-49
B+	80-84	D	40-44
B	70-79	F	0-39
B-	65-69		
C+	60-64		
C	55-59		

Tentative Class Calendar and Topics:

Disability Resource Accommodation:

Reasonable accommodations are available for students who have a documented disability. Please notify the instructor the first week of class of any accommodations needed for the course. Late notification may cause the requested accommodations to not be available. All accommodations must be approved through the Disability Resource Center (DRC) (Washington Building, Room 217). Please stop by or call 509-335-3417 to make an appointment with a disability specialist <http://www.drc.wsu.edu>.

Academic Honesty:

WAC 504-25-015. Academic dishonesty, such as cheating, plagiarism, fabrication, and fraud, is prohibited. See <http://www.conduct.wsu.edu/default.asp?PageID=343> for more information and specific definitions of academic dishonesty.

As an institution of higher education, Washington State University is committed to principles of truth and academic honesty. All members of the University community share the responsibility for maintaining and supporting these principles. When a student enrolls in Washington State University, the student assumes an obligation to pursue academic endeavors in a manner consistent with the standards of academic integrity adopted by the University. To maintain the academic integrity of the community, the University cannot tolerate acts of academic dishonesty including any forms of cheating, plagiarism, or fabrication. Washington State University reserves the right and the power to discipline or to exclude students who engage in academic dishonesty. To that end, the University has established the following rules defining prohibited academic dishonesty and the process followed when such behavior is alleged. These rules incorporate Washington State University’s Academic Integrity Policy, the University-wide document establishing policies and procedures to foster academic integrity. This policy is applicable to undergraduate and graduate students alike, as it pertains to dishonesty in course work and related academic pursuits. In cases of dishonesty in research and original scholarship, the University’s Policy and Procedural Guidelines for Misconduct in Research and Scholarship may take precedence over the policies and procedures contained herein.

Academic dishonesty includes cheating, plagiarism, and fabrication in the process of completing academic work. These standards should be interpreted by students as general notice of prohibited conduct. They should be read broadly, and are not designed to define misconduct in exhaustive forms.

Campus Safety Plan

Can be found at <http://safetyplan.wsu.edu> and <http://oem.wsu.edu/emergencies>, contains a comprehensive listing of university policies, statistics and information related to campus safety, emergency management and the health and welfare of the campus community.

Disclaimer: This syllabus is subject to change to facilitate instructional and/or student needs.
